---

**LS Corporation Co., Ltd**

# 1. Greetings from President

Company that thinks about Tomorrow's Health

LS Corporation is providing various solutions in order to realize ideas of people who want to be young and healthy forever.

By studying preventive medicine and functional nutrition, we would like to contribute to aging society so that people can spend daily lives healthily, happily and comfortably.

It is our mission to provide good quality products and services to customers through our enthusiasm.

LS Corporation Co., Ltd  
President Mr. Makoto SUZUKI

## 2. VISION & CI

### VISION

Nowadays, it is a very important theme to live long in a healthy condition in Japan which is in an aging society. In the United States, the KYB movement (Keep Your Body) was established with the meaning of "protecting your body by yourself". And exercising and dietary supplement became to be used routinely. In Japan, replacing "B" (Body) with a more fundamental "G" (Gene), "KYG (Know & Keep Your Genes) movement was established with the meaning of " Knowing your gene and protecting your body by yourself". From this point of view, gene nutrition which focused on importance of food and its functionality was proposed, and we agreed with this idea, we have developed various original raw materials and supplements. We will continue to strive to maintain and promote the health of people based on this movement.

### Corporate Identity

#### Meaning of Logo mark (HEART & HANDS):

With being a partner by joining hand and hands with those concerned, we always contact with a heart (trust). The basic idea of corporate identity is under life science.
